HEAVY-DUTY ALUMINUM UPPER TIMING COVER

06L103269DPRM | ÜRO-018938 | 2013-2019 VW

OEM DESIGN FAULT

The OEM plastic timing cover warps and cracks under sustained engine heat, while its molded-in gasket surfaces harden and shrink. The result is a chronic oil leak across the front of the engine that worsens with every heat cycle.

ÜRO PREMIUM SOLUTION

Engineered with heavy-duty aluminum construction and improved gasket sealing surfaces that resist the warping and cracking that plague the factory plastic part, the ÜRO upper timing cover stops oil leaks at the source and stays sealed long term.
